Session Title: Projects
Session No: 7

Learning Objectives:

By the end of this session students will be able to:
- Build an application to meet the requirements of a project brief
- Design and implement extensions to the project

Session Outline

Intro & Framing
5 mins

In this session students will work on their projects. At the start of the session try to check-in with each of the groups to assess their progress.

If you have time to organise it, the start of this session is an ideal time to have someone deliver a short (< 10 minutes) presentation about their work as a developer. Ideally the person giving the presentation should have a similar background to the students on the course (Junior level)

Block #1: Projects

120 minutes

Students will work on their projects.

Recap & Closing
5 mins

Remind students that they can work on their projects for half of the final session. In the second part of the final session they will present their projects to the other students.

Homework Tasks

Students should continue working on their projects as homework
